

Volumes #3

The region in Quadrant I bounded by the parabola $y = 4 - x^2$ is rotated about the y-axis to form a solid paraboloid. Find the volume of this paraboloid if x and y are in inches.

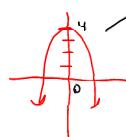

$$\text{recall } V = \int_a^b \pi [f(x)]^2 dx$$

about the y-axis

$$dV = \pi x^2 dy$$

Solve eqn $y = 4 - x^2$
for x^2

$$\therefore V = \pi \int_0^4 (4-y) dy$$

$$= \pi \left[4y - \frac{1}{2}y^2 \right]_0^4$$

Integrate

$$= \pi \left[4(4) - \frac{1}{2}(4)^2 - 0 \right]$$

$$= 8\pi \text{ in}^3$$

- ① Find the volume of the solid generated when the region enclosed by $y = \sqrt{x}$, $y = 2$ and $x = 0$ is revolved about the y-axis

$\frac{32\pi}{5}$

② $y = 3 - 2x$ interval $[0, 2]$

$\frac{13\pi}{6}$

③ $y = \frac{1}{x}$ $x = 2$ $y = 2$

$\frac{3\pi}{2}$

④ $x = y^2$ $x = y+2$

$\frac{72\pi}{5}$
